	Install Date:	2014

SOLAR SIGN LIGHTING

Ironworks Gym
Binghamton, NY

The Customer's Problem

Ironworks Gym, a 24-hour self-service gym in Binghamton, NY needed to illuminate their 2-sided sign which was mounted high up on a pole in order to draw attention their downtown business during the night and late afternoon during the short winter days in upstate NY. A traditional electric lighting system would have been too costly for installation and operation.

Our Solution

2 of our GenLight 2X commercial solar sign lights were chosen as the perfect solutions for the customer's lighting needs and budget. The high-output LEDs provide ample illumination for the customer's sign and the self-contained solar powered lights mean there was no electrical connection or monthly usage cost.

PRODUCT(S) USED

GenLight 2X Commercial Solar Sign Light
SKU: Genlight-12v-2X-V1 (x2)

PROJECT OVERVIEW

Ironworks Gym, a 24-hour self-service gym in Binghamton NY needed to illuminate their large pole-mounted sign without breaking the bank on an electric grid connection and monthly electric bills.

2 GenLight 2X solar sign lights (1 for each side of the sign) were chosen because of their high-output 120 LEDs and their strong performance during cold, snowy New York winters. The lights and solar panels were mounted to the sign using our GenLight 4' aluminum mounting arms, providing a secure, hassle-free installation.
