	Customer:	Ommegang Brewery
	Location:	Cooperstown, NY
	Project Type:	Sign / Monument Lighting
	Install Date:	12 / 2013

SOLAR SIGN LIGHTING

Ommegang Brewery
Cooperstown, NY

The Customer's Problem

Ommegang Brewery wanted to light up their sign without having to wire and run a traditional sign lighting system, which can get overly expensive at NYS electric prices. A traditional lighting system would have required trenching, re-landscaping and a monthly electric bill for running the lighting system.

Our Solution

Our lighting engineers developed a slightly customized GenLight-4X commercial solar sign lighting system that fit the customer's budget, met their lighting requirements and performed well in the colder, harsher upstate NY weather (such as very cold, snowy winters).

PRODUCT(S) USED

GenLight 4X Commercial Sign Light
SKU: GenLight-4X

PROJECT OVERVIEW

A Genlight-4x custom lighting kit was used to light up the sign at the Ommegang Brewery right before Christmas. The system immediately saved the customer money by offering them an alternative to running power out to the sign from the grid. The difference in material cost of the Genlight-4x and the proposed installation of running power from the grid to the sign was already well over \$1000 in favor of the Genlight. After the installation Adam continues to save approximately \$25 a month by lighting his sign with the sun through the help of the Genlight-4x custom lighting kit.

FINANCIAL DETAILS

Total Project Cost	\$ 1800
Federal Incentives	\$ 0
State / Local Incentives	\$ 0
Est. 1 Year Savings	\$ 300
Est. 5 Year Savings	\$ 1500
Anticipated Payback Period	1 Year
